RESEARCH INTEREST

As a research engineer specializing in cognitive and data sciences, my work focuses on the design and implementation of experimental protocols combining cognitive tasks, behavioral data, physiological measures, and mixed quantitative–qualitative approaches in both clinical and applied contexts. I am particularly interested in understanding how cognitive processes shape human behavior, beliefs, judgments, and social interactions, especially in relation to contemporary societal issues. My strong background in statistical analysis and programming supports advanced data processing and modeling. Across these questions, I adopt an intersectional perspective, with a sustained interest in individual diversity, social inequalities, and underrepresented populations, and in the ways cognitive science can contribute to a more inclusive understanding of individuals and society.

EDUCATION

Master in Cognitive Science *2023*
Université Lumière Lyon 2, Lyon
1st year of a Master's Degree
Thesis: 'Nonverbal behavioral cues and personality traits in concealing hostile intentions'
Ranking: Class Salutatorian, *Magna cum Laude*

Extra curriculars: Class President

University Degree in Innovative Scientific Communication *2022*
Learning Planet Institute, Université Paris Cité, Paris
Ranking: *Summa cum Laude*

Bachelor in Mathematics and Informatics applied to Cognitive Science *2018 - 2021*
Université Lumière Lyon 2, Lyon
Thesis: 'Eye movements as behavioral markers of food avoidance in patients with restricting Anorexia Nervosa'
Ranking: Class Valedictorian, *Summa cum Laude*

Extra curriculars: Class President

RESEARCH EXPERIENCE

Research Engineer *September 2026 - Present*
Inserm U1290 Research on Healthcare Performance (RESHAPE), Université Claude Bernard Lyon 1, Université Lumière Lyon 2

- Dr Ludivine Jamain and Dr Charlotte Bauquier
- Project: **SOLSTEEN** – Sun Exposure Prevention and Health Education in Adolescents.
- Funding: INCa AGIR-SP (French National Cancer Institute).
- Contributing to a school-based public health intervention aimed at preventing UV-related risks among adolescents through educational strategies and environmental modifications.
- Coordinating the development of evidence-based educational toolkits addressing UV exposure, sun protection behaviours, risk perceptions, and social influences.
- Designing and developing the project's website to disseminate scientific findings, educational resources, and prevention materials.
- Collaborating with researchers, healthcare professionals, and external partners to support project implementation, scientific communication, and knowledge transfer.

Research Engineer *February 2026 - August 2026*

Inserm U1290 Research on Healthcare Performance (RESHAPE), Université Claude Bernard Lyon 1, Université Lumière Lyon 2

- Dr Ludivine Jamain and Pr Christine Morin-Messabel
- Project: DIVERCITY – Neurodiversity and Inclusive Urban Environments
- Funding: SHAPE-Med@Lyon (Structuring one Health Approach for Personnalized Medicine in Lyon).
- Designing and coordinating mixed-methods research protocols (quantitative and qualitative) to study barriers and facilitators of accessibility for neurodivergent individuals in urban and commercial environments.
- Developing data collection tools (questionnaires, interviews), supporting data acquisition in collaboration with academic and institutional partners, and contributing to statistical and qualitative data analyses.
- Participating in interdisciplinary and multi-partner collaborations, and contributing to scientific reporting and dissemination.

Research Engineer *April 2025 - October 2025*

Inserm UMR1350, Physiopathologie et Traitement des Maladies Hépathiques, Université Claude Bernard Lyon 1

- Dr Emilie Favre and Dr Romain Parent
- Project: PSYLIVER
- Funding: SHAPE-Med@Lyon (Structuring one Health Approach for Personnalized Medicine in Lyon).
- Combined neuropsychological and neuro-hepatological approaches for studying the evolution towards hepatocarcinoma.
- Designing and programming a cognitive task integrating physiological measures (ECG, ICG, EDA); developing analysis pipelines for signal processing and composite score computation; and producing comprehensive documentation and tutorials to ensure reproducibility and project continuity.

Research Engineer *October 2023 - December 2024*

Laboratoire d'Étude des Mécanismes Cognitifs (EMC), Université Lumière Lyon 2

- Dr Hakim Djeriouat (Team: *NeuroCognition, Justice & Criminality*)
- Project MORALEM
- Funding: French National Research Agency.
- Appraisal perspective on third-party morality: situational and dispositional factors on moral emotions and social behaviors.
- Designed and preregistered experimental paradigms, drafted projects for ethics committees, programmed and conducted experiments, collected and analyzed data, presented at an international conference, participated in the writing of scientific papers (one as first author), and participated in the drafting and management of research grants.

Research Intern *October 2022 - June 2023*

Laboratoire d'Étude des Mécanismes Cognitifs (EMC) *308h*

- Dr Geoffrey Duran (Team: *NeuroCognition, Justice & Criminality*)
- Personality traits, non-verbal behaviors and the detection of criminal intentions.
- Implemented experimental tasks, participated in the drafting of projects for ethics committees, developed a web application for data collection, analyzed data, presented at national and international conferences, and participated in the writing of a scientific paper (as first author).

Research Intern *March 2022 - July 2022*
Laboratoire Entrepôt, Représentation, Ingénierie des Connaissances (ERIC) *525h*

· Pr Stéphane Chrétien (Team: *Data Mining & Decision*)
· Topological analysis and signature theory applied to time series (functional brain imaging).
· Developed and programmed applications of topological analysis and Machine Learning to neuroscience, co-supervised undergraduate trainees, teaching Python & Machine Learning.

Research Intern *December 2020 - December 2021*
Institut des Sciences Cognitives Marc Jeannerod (ISC-MJ), CNRS UMR5229 *300h*

· PI Léon Tremblay (Team: *Basal Ganglia*)
· Project: SEVIALANO.
· Funding: French National Research Agency.
· Serotonin modulation of cortical-Basal Ganglia circuits involved in food intake and anxiety: Multimodal brain imaging investigation on anorexic patients.
· Design and implementation of experimental tasks, acquisition and analysis of clinical, behavioral (eye-tracker) and imaging (PET-MRI) data.

TEACHING & SUPERVISION

Lectures & Seminars *September 2022 - Present*

Bachelor courses (306 HETD)

· Cognitive Neuroscience (*Lecture*) – Université Lumière Lyon 2 *18h*
· Cognitive Science & Neuromyths (*Lecture*) – Université Lumière Lyon 2 *12h*
· Cognitive Science in the Professional World (*Lecture*) – Université Lumière Lyon 2 *12h*
· Introduction to Statistics (*Seminar*) – École des Psychologues Praticiens de Lyon *36h*
· Probability (*Seminar*) – Université Lumière Lyon 2 *20h*
· Inferential Statistics (*Seminar*) – Université Lumière Lyon 2 *18h*
· Inferential Statistics (*Seminar*) – Université Catholique de Lyon *100h*
· Inferential Statistics (*Seminar*) – École des Psychologues Praticiens de Lyon *90h*

Master courses (73 HETD)

· Applied Cognitive Science (*Seminar*) – Université Lumière Lyon 2 *2h*
· Introduction to Python (*Seminar*) – Université Lumière Lyon 2 *15h*
· Programming for Psychology Experiments (*Seminar*) – Université Lumière Lyon 2 *56h*

Supervision & co-supervision *June 2022 - Present*

Undergraduates

· 2 student in Cognitive Science – Université Lumière Lyon 2
· 6 students in Psychology – Université Lumière Lyon 2
· 12 students in Data Science – Université Lumière Lyon 2

Master's students

· 2 students in Cognitive Science – Université Lumière Lyon 2
· 7 students in Psychology – Université Lumière Lyon 2
